

CE IPX7

Solar powered LED road marker.

1. Environmentally Friendly: Full energy-saving, no pollution and incorporates recycled materials.
2. Fast and Easy installation: No wiring, no trenching, no switch, and no power cord/battery recharging necessary.
3. Smart Technology: Automatic ON/OFF.
4. Reliable and Durable: Superior long-lifetime solar cells and high-quality capacitor.
5. Free of Maintenance: All-weather, water-proof, UV stabilized, shock-resistant, Impact - resistant
6. Wide Applications: Ideal for most road classes as warning light markers

Model		e8E00501
Battery Pack	Material	Capacitor
	Life	5 years
	Capacity	600-800 mAh
Light Source		High Bright LED
Colors		RD
Body	Material	UV resist Enhanced Engineering Plastics
	Construction	Resist Pressure, Water-proof
	Dimensions	50x48.5mm
Wight		0.112kg
Control System		Light Sensor
Run-time after full Charge		12 hrs
Output Power (mW)		7.5 mW
Operating Temperature		-20 to 60 C
