

Installation Instructions

- (1) Remove from packaging. Carefully remove the eight hex bolts from Aluminum Cover B as shown in Figure 1.

Figure 1

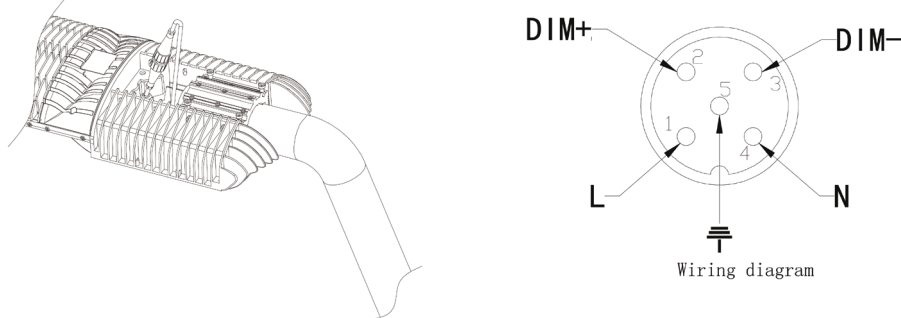

- (2) Loosen the four hex bolts on Aluminum Cover A by approximately 5mm. Place the lighting unit onto the pole ensuring that the pole is pushed firmly home as shown in Figure 2. Then fully tighten the four hex bolts, ensuring that the light unit is securely attached to the pole.

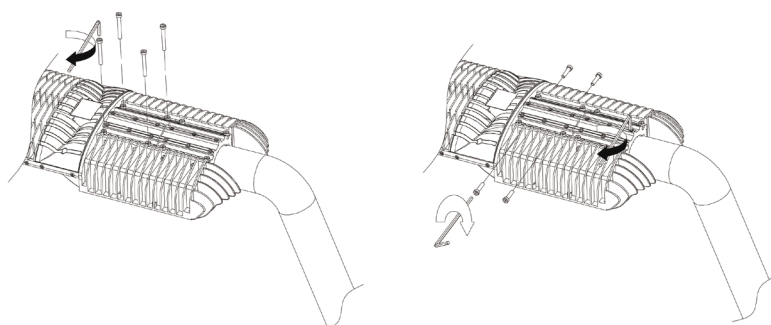

- (3) Remove connector motherboard from its packaging, join the wires and lock the waterproof connector cover. As shown in Figure 3.

Figure 3

- (4) Replace cover B and tighten eight hex bolts as shown in Figure 5 ensuring that the cover is secure.
